

801

Door entry telephone

The model 801 is Bell Systems' original door entry telephone. It has been re-styled a number of times over the years and still maintains its classic design. The 801 telephone continues to be the most popular in the UK market owing to its exceptional reliability and economical price.

801 - Standard

The model 801 telephone operates from both 12V AC or 12V DC and is included in the standard model 900 and VRK audio door entry systems as well as the CS and CSP series of combined keypad and proximity door entry systems.

The telephone is manufactured in white high-impact ABS plastic for high durability and complements most wall furnishings. It incorporates a 'lock release' push-button discreetly positioned on the base, and under the handset, to prevent inadvertent use. With its wide handset the model 801 is especially recommended for the elderly.

The Electronic Ringing Tone has a useful safety feature whereby the tone is reduced when the handset is 'off the hook'. The telephone has two levels for the ringing tone. A HI or LO position can be set within the telephone on installation or at future date.

Model 801-DESK

The model 801-DESK is available for table top mounting. The model 801-DESK is factory fitted on a sloped pedestal for ease of use and has a captive cable and telephone wall mounting socket.

801S - Mute Switch

On this model a switch is included on the side of the telephone to allow the user to mute the call-tone and prevent disturbances from nuisance calls.

Model 801

801P - Privacy of Speech

This model allows any conversation between the visitor and the resident on the called telephone to be totally private. The telephone will remain 'live' for a set period after being called and will then automatically close down the speech connection. The 'privacy of speech' feature is highly recommended on systems that have in excess of 10 stations.
