Surface mount door entry panels

The Portabello surface mounting door entry panels offer an elegant, distinctive and timeless statement at the entrance door.

These panels are manufactured in 2.5mm marine grade stainless steel and are highly polished to create an impressive mirror finish. The vandal resistant push-buttons are also polished to complement the panel finish and have a nameplate window for identification.

All Portabello panels are designed for surface mounting only with each panel supplied with a rigid surface box which is powder-coated for external locations. The panel is attached to its back-box with security fixings.

The range includes both audio and video panels with proximity and keypad options. The maximum number of push-buttons for each version is indicated in the table;

Model CS-PB1

Panel sizes by number of push buttons

Box Size (mm)	Video PBV		Video + Prox CSP-PBV			Video + Keypad CS-PBV			
100 x 288	1	2							
100 x 388	3	4	1	2	3	1	2
