ARROW

Suitable for all iPad models, Galaxy, Kindle Fire, and any other tablet up to 12.5mm in thickness.

Not just another tablet stand! This is your ergonomic interface between you and your tablet.

Anyone using a tablet computer will be familiar with the uncomfortable feeling of not having any support for the hands or wrists whilst typing, or having the screen too low whilst viewing the screen. The ARROW addresses both these issues.

Ergonomic Cafe tablet solutions are the only stands that offer the user the unique ergonomic and comfort benefits of palm and wrist support, whilst also lifting the screen to an improved viewing angle and height. However the ARROW also offers the benefit of raising the screen height for use with an external keyboard, video conferencing or viewing videos or documents. For these outstanding benefits the ARROW has been awarded the coveted FIRA ERGONOMICS EXCELLENCE AWARD for the unique and outstanding ergonomic benefits it offers the user.

Whilst typing, position the ARROW and tablet at the front of the desk to allow for straight and natural wrist form.

Designed and ergonomically tested to be used at a desk, on a table, on your lap and even lying down. In-fact EVERYWHERE you want to use your tablet, you can now use it comfortably.

Benefits:

- Folds flat for easy transportation with wallet
- 1 Palm support setting at 22°
- 2 Height settings
- 5 angle settings from 54° to 75°.

Compactly folds to just 240mm x 200mm x 7mm and weight just 150 grams!

Innovative design allows the tablet to be charged whilst supported at your chosen angle by the stand.

The unique and innovative functions and benefits of this product have been protected by the Patent application process.
