

## GO FLEX & GO FLEX COMPACT

Winner of the Fira Ergonomic Excellence Award.

The new transparent Go Flex offers easy and quick angle adjustment across 12 levels from an incredible 8° to 55°! And just 1.75kg in weight, and incorporating a padded document shelf to ensure no pressure is applied to the users wrists, and includes a removable rigid shelf for heavier items. The unique and innovative new design allows significant space at the rear and beneath the document surface. This makes the Go Flex the perfect solution for desktop monitors on large or bulky stands, and also laptops on stands. But unlike most other products, still allows the document surface to be positioned directly under the screen at almost **any** screen height. With one hand operation to raise the working surface, and right or left hand control to lower it the unit adjusts in seconds!

The design of the Go Flex allows the document holder to transform into an A3 reading and writing slope by simply gliding the unit forward over the keyboard. You should always bring the work closer to you and avoid leaning forward. The Go Flex allows you to do this easily. As the design offers full clearance above the keyboard no sacrifice on the angle of document surface is required. Once clear of the keyboard the Go Flex angles can be adjusted to reading/writing angles. And when the keyboard is required the unit simply glides back into its document holder position, and thus maximising your desk space.

- Document Holder? - Built In!
- Adjustable Reading Slope? - Built In!
- Adjustable Writing Slope? - Built In!
- 12 Levels of adjustment!
- Rigid removable shelf? Included!
- Book Holder? - Available!

12 Angles from 8° - 55°.

Standard:

W 570mm, D 310mm, H 110mm(min) Weight: 1.75kg.

Keyboard width clearance 475mm

Compact:

W 470mm, D 310mm, H 110mm(min) Weight: 1.6kg.

Keyboard width clearance 375mm
