

USB-C Docking Station

Expand your workspace by adding an additional desktop monitor. You can run the DisplayPort, HDMI and VGA ports simultaneously, but they will only show the same content.

| All display output ports run at max 1920x1080p @ 60Hz

Extend Mode

| Extend your workspace by making it bigger. Extend mode allows you to share your desktop on a bigger desktop display. Ideal for improved productivity by working with, and viewing, multiple applications at the same time.

Clone Mode

| Allows you to replicate the same content on your second display as you do on your master display.

2 Front USB 3.1 Ports

| Two fast and powerful USB 3.0 ports are positioned on the front of the dock for when you want to charge a phone or tablet, transfer data from another device or add hardware like keyboards, mice, printers etc.

2 Side USB-C 3.1 Ports

| One port is for data transmission up to 5Gbps, the other supports PD (Power Delivery) at max 20V 3A (60 Watt).

1 USB-C 3.1 Cable (located at the back)

| On the left side a single USB-C port enables you to connect with your pc via the USB-C cable located at the back.
