

RACKMOUNT•IT CisRack

Cisco provides very good performing devices for small and medium sized businesses; however these are desktop models. These days businesses move to 19 inch racks and the new CisRack kits are excellent to fit Cisco devices into 19 inch cabinets.

The CisRack kit is an excellent add-on to place your high performance Cisco in a 19 inch rack. On top of that it brings the essential console and network connections to the front!

The Cisco model RM-CI-T1 has 9 connections on the front including the console connection.

Assembly will take about 5 minutes. Simply slide your Cisco device in the kit, place the retainers and connect the supplied cables to the keystones.

CisRack kits are delivered in RAL 5020. Other colors can be delivered on project basis.

Model	Supported Cisco model	Dimensions
RM-CI-T1	Cisco ASA 5505 and Cisco Air-WLC2125	1.3U

Rackmount your Cisco !
