

≈ AIRTAME

WIRELESS STREAMING MADE EASY

Airtame is a wireless presentation device that plugs into the HDMI port of any TV or projector, allowing you to instantly display content from all major platforms using just an app and regular WiFi.*

*“Having a wireless solution lets us save money.
The screen cables often break or go missing.”*

*- Thomas Steinmeyer Dresler, IT supporter and Network Admin
at Campus Vejle, Denmark*

* Mac OS X 10.9+, Windows 7, Windows 8, Windows 8.1, Windows 10, Ubuntu, Linux, Android 4.0.1+, iOS 7+, Chromebook

Cross-platform streaming

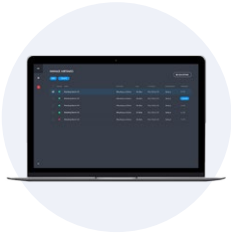

Everyone can connect and stream from their favorite device, using the free Airtame application.

   iOS   *New! Chromebook in Beta*

Customizable background

Easily set live webpages, images or data dashboards as the background on your Airtames.

Control from the cloud

Remotely administer and troubleshoot your Airtame devices from a web browser.*

**Initial Cloud Platform release due out Fall 2016, with additional features being added in the subsequent months*
